

Sea Water Desalination – UNIHA Wassertechnologie GmbH

Contract Description / Solution:

AIM manufactured and assembled RO-skids by order of UNIHA Wassertechnologie GmbH Linz and on behalf of an Iranian end customer.

AIM's scope of work included pre-assembly of pressure pipes provided for reverse osmosis (25.000m³/day) in 6 skids with 3 units and 18 pressure pipes each. Furthermore AIM manufactured the pressure pipes PN100 and the frame in stainless steel (1.4539) and bonded the PVC-permeate-pipes.

Specific characteristic of this offer was that all services required - such as laser cuts, beveling of frame profiles, bonding of PVC-permeate-pipes, manufacturing of pipes, welding and so on – could be covered within AIM itself.
